La Real Casina di caccia di Ferdinando IV di Borbone nel bosco della Ficuzza (Palermo). Analisi diretta alla tutela del monumento

1995

# **THE ROYAL HUNTING PALACE OF KING FERDINANDO IV BORBONE IN THE FICUZZA WOOD (PALERMO): SURVEY FOR THE DEFENCE OF THE MONUMENT**

(con Fabio Morello e Filippo Mulè)

*All steps of the Royal Palace's survey are completely and exhaustively related, ranging from the research of all the original documents required to a detailed reconstruction of the steps and the constructive techniques, of the designers and workers, to the reconnaissance of those historical events that have directly involved the building's life, in the background of important political changes.*

*The exact and critical survey is showed in fourteen great colored plates (scale 1:50) and the analysis of structural deterioration is illustrated in four great colored plates (scale 1:50).*
