## ORIZZONTI DELLA SCIENZA DELLA RAPPRESENTAZIONE

1996

## **HORIZONS OF REPRESENTATION SCIENCE**

*From the strict and detailed examination of the identity and the role of the Space Representation Science within the universal scientific view, the image appears of a science very often misunderstood, or, perhaps, more exactly, broken up and so dispersed and depreciated.*

*The Author warmly appeals to all the scientists for a close and fertile collaboration among all the research fields, so that the scientific progress doesn't shatter, and urges the representation science teachers to work so that the fundamental role that belongs to this science by right in all fields is recognized.*
